Introduction

Afin de disposer d'éléments concrets pour éclairer la décision publique, le groupe de travail BSN4 a demandé à l'Inist la réalisation d'une étude bibliométrique sur les publications françaises en Open Access (OA) sur une période de 5 ans, de 2010 à 2014, afin d'en connaître le poids dans la production scientifique française et tenter d'estimer le montant des APCs.

Ce document présente les résultats de l'étude bibliométrique. Les données sont également consultables via le tableau de bord dynamique créé à l'aide de l'outil libre ezVIS¹, dont l'accès est réservé.

Deux documents sont liés à cette étude :

- **OpenAccess_BSN4_Méthodologie_30septembre2016.docx**
- **OpenAccess_BSN4_Remarques_Préconisations_30septembre2016.docx**

La source de collecte des publications est le *Web of Science (WoS) Core Collection* de Thomson Reuters en écartant les bases consacrées aux SHS (Sciences Humaines et Sociales) considérées comme peu représentatives. La recherche, effectuée en octobre 2015², est limitée aux publications françaises (métropole et outremer), aux dates de publications 2010 à 2014 et aux types de documents : *articles, proceedings-papers, reviews et letters*.

Les indicateurs calculés mettent en évidence l'évolution de la part des publications françaises OA en STM (Sciences, Technologie, Médecine), ainsi que leurs répartitions par :

- type de document,
- éditeur,
- périodique,
- thématique, et plus précisément par discipline ESI (*Essential Science Indicators*),
- organisme pour chacun des 5 organismes retenus : CEA, CNRS, Inra, Inserm, ParisTech.

Le coût des publications françaises OA – montant des APCs – est également calculé :

- pour la France,
- pour chacun des 5 organismes retenus (cités ci-dessus),
- par éditeur,
- par périodique.

¹ <https://github.com/madec-project/ezvis/>

² D'où les écarts avec une recherche effectuée en septembre 2016 : selon les années, on arrive à une différence de 3 à 6% pour le corpus global, et de 4 à 8% pour le corpus STM et les types de documents retenus.

Evolution du nombre de publications françaises en STM

Le tableau et le graphique ci-dessous présentent les publications françaises extraites du WoS, puis après différents traitements, les publications en STM (Sciences, Technologie, Médecine) correspondant aux typologies de documents retenus pour l'étude, et enfin, les publications françaises OA en STM. Pour ces dernières, on observe un fort taux de croissance sur la période 2010-2014 : + 84%.

| Publications françaises | 2010 | 2011 | 2012 | 2013 | 2014 | 2010-2014 |
|--|--------------|--------------|--------------|--------------|--------------|----------------|
| Publications françaises WoS, STM & SHS, tous types de documents | 84 490 | 88 588 | 90 057 | 93 580 | 95 444 | 452 159 |
| Publications françaises STM selon les types de documents : <i>articles, proceedings-papers, reviews et letters</i> | 67 780 | 70 213 | 70 907 | 74 204 | 75 053 | 358 157 |
| Publications françaises OA STM | 4 761 | 5 883 | 6 931 | 8 331 | 8 754 | 34 660 |
| Part des publications françaises OA STM (Taux de croissance des publis françaises OA STM) | 7% | 8% | 10% | 11% | 12% | 10% |
| | | (+24%) | (+18%) | (+20%) | (+5%) | (+84%) |

Tableau 1 : Evolution du nombre de publications françaises (nombre global et en STM)

La *part des publications françaises OA* est calculée par rapport au nombre de publications françaises (métropole et outre-mer) en STM des types de documents retenus (*articles, proceedings-papers, reviews et letters*) pour l'étude. Le *taux de croissance du nombre de publications françaises OA en STM* entre 2 années correspond à la différence des nombres de publications entre les années N et N-1 par rapport au nombre de publications de l'année N-1 et, pour la période 2010-2014, la différence entre les nombres de publications de 2014 et de 2010 par rapport à celui de 2010.

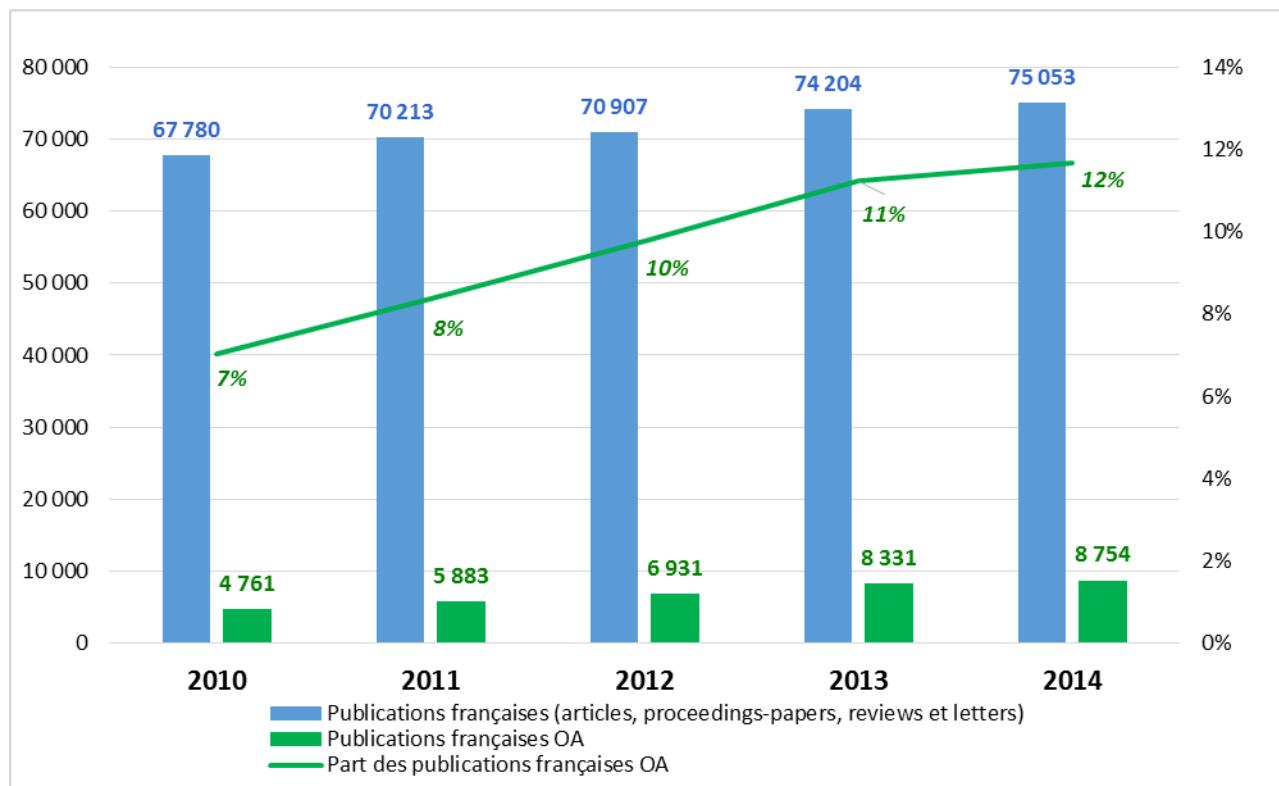

Figure 1 : Evolution du nombre de publications françaises en STM

Si le faible taux de croissance (+5%) entre 2013 et 2014, par rapport aux années antérieures (entre +18 et +24%) est difficilement explicable, il reflète cependant la progression des productions scientifiques française et mondiale. En effet, la diminution de la croissance est pour toutes d'un facteur de 2,5 environ.

Répartition du nombre de publications françaises par statut des périodiques

Après des traitements d'homogénéisation des titres des périodiques du corpus de publications françaises, les titres et leurs ISSNs sont comparés à ceux de plusieurs listes de périodiques OA et « Hybride » :

1. La liste des périodiques considérés comme OA dans le JCR (*Journal Citation Reports*³ produit par Thomson Reuters) de chaque année.⁴
2. La liste de périodiques du DOAJ (*Directory of Open Access Journals*) au 30 mai 2016⁵. Elle précise l'année à partir de laquelle le périodique est devenu OA.
3. La liste des périodiques ROAD⁶ (Répertoire des ressources scientifiques et universitaires en libre accès) en 2015.
4. La liste de périodiques OA de 7 éditeurs, appelés dans l'étude « Grands Editeurs », (Elsevier, Springer, Taylor & Francis, Wiley Blackwell, Nature, IEEE, ACS) en 2015⁷.
5. La liste de périodiques « Hybride » des 7 « Grands Editeurs » ci-dessus en 2015.

Une fois les passes réalisées, les périodiques sont marqués de la manière suivante :

- périodiques OA (OA_JCR et/ou OA_DOAJ ou OA_ROAD et/ou OA_GrandsEditeurs)
- périodiques « Hybride » des « Grands Editeurs » (Hybride_GrandsEditeurs)
- périodiques ni OA, ni « Hybride » des « Grands Editeurs » (NiNi_GrandsEditeurs)
- périodiques sans statut (SansStatut).

Le tableau et le graphique ci-dessous présentent les résultats, par ordre décroissant du pourcentage des statuts des publications sur la période, après répercussion de ce marquage et avant leur traitement via l'application CrossRef.

Exemple : les publications d'un périodique marqué « Hybride » se voient attribuées le marquage « Hybride ». Ainsi pour la période 2010-2014, 37% des publications du corpus sont issues de périodiques « Hybride » mais ne sont pas forcément OA.

³ http://wokinfo.com/products_tools/analytical/jcr/

⁴ Le résultat du filtre "Open Access" proposé par Thomson Reuters dans le WoS pour chaque notice n'a finalement pas été utilisé car la notion d'OA est attribuée à l'ensemble des publications du périodique quelle que soit l'année à laquelle le périodique est devenu OA : un périodique absent de la liste OA en 2010 et présent dans la liste OA 2011 voit ses publications 2010 considérées comme OA.

⁵ <https://doaj.org/csv> Cette liste est mise à jour toutes les 30 minutes.

⁶ <http://road.ISSN.org/en>

⁷ Les listes retenues de 2014 ou 2015 ne précisent pas le statut des périodiques pour les années antérieures.

Appui au Pilotage Scientifique

Publications françaises OA – Etude bibliométrique

La part des publications issues de périodiques « Hybride » et « SansStatut » est conséquente. Par la suite, il sera indispensable de réduire la part des « SansStatut » (cf OpenAccess_BSN4_Remarques_Préconisations_30septembre2016.docx).

| | 2010 | | 2011 | | 2012 | | 2013 | | 2014 | | 2010-2014 | |
|----------------------|---------------|-----|---------------|-----|---------------|-----|---------------|-----|---------------|-----|----------------|-----|
| | Nb | % | Nb | % |
| Corpus France | 67 780 | 100 | 70 213 | 100 | 70 907 | 100 | 74 204 | 100 | 75 053 | 100 | 358 157 | 100 |
| Hybride | 24 330 | 36 | 25 544 | 36 | 26 173 | 37 | 27 914 | 38 | 27 756 | 37 | 131 717 | 37 |
| SansStatut | 23 299 | 34 | 23 815 | 34 | 23 435 | 33 | 22 676 | 31 | 23 043 | 31 | 116 268 | 32 |
| NiNi_GrandsEditeurs | 15 414 | 23 | 15 045 | 21 | 14 480 | 20 | 15 437 | 21 | 15 720 | 21 | 76 096 | 21 |
| OA | 4 737 | 7 | 5 809 | 8 | 6 819 | 10 | 8 177 | 11 | 8 534 | 11 | 34 076 | 10 |

Tableau 2 : Répartition du nombre de publications françaises par statut de périodiques

Hybride : publication issue d'un périodique considéré comme « Hybride » d'après les listes de périodiques des « Grands Editeurs ».

SansStatut : publication issue d'un périodique considéré comme sans statut (périodique non édité par les « Grands Editeurs » et marqué ni OA, ni « Hybride »).

NiNi_GrandsEditeurs : publication issue d'un périodique édité par un « Grand Editeur » marqué ni OA, ni « Hybride ».

OA : publication issue d'un périodique considéré comme OA par une des listes de périodiques suivantes : JCR, DOAJ, ROAD, OA des « Grands Editeurs ».

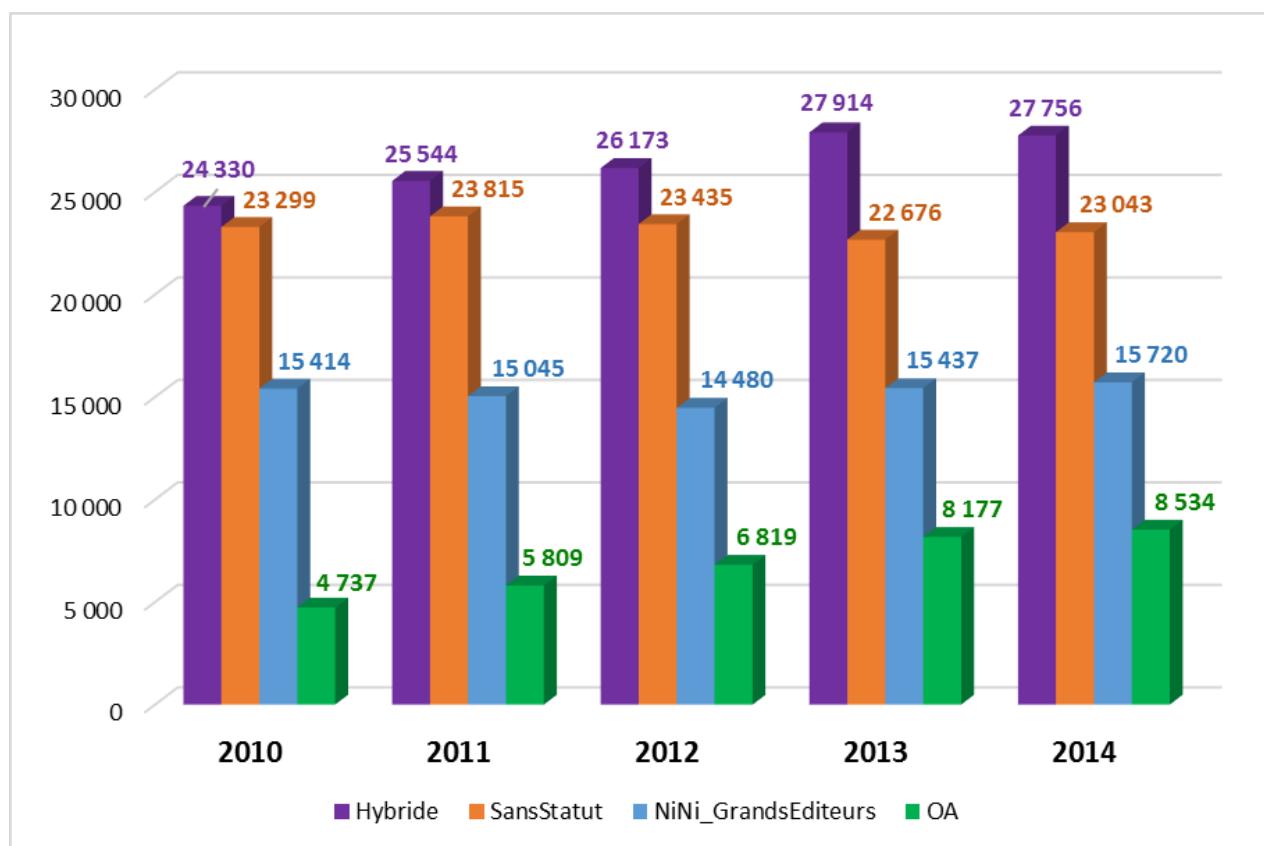

Figure 2 : Répartition du nombre de publications françaises par statut de périodiques

Répartition du nombre de publications OA par statut de publications

Les publications issues de périodiques OA sont ensuite marquées OA_OA.

Le DOI des autres publications (« Hybride », « SansStatut » et « NiNi_GrandsEditeurs ») est isolé pour interroger l'API CrossRef et récupérer les mentions de licence. Les valeurs « Doi-License-Content-Version » et « doi-license-URL » retournées par l'API sont exploitées. Les notices dont le DOI est associé à la valeur « VoR » (*Version of Record*) d'une part, et aux urls de licence suivantes d'autre part, sont considérées comme OA :

- <http://creativecommons.org/licenses/by/3.0/>
- <http://creativecommons.org/licenses/by/2.5/za/>
- <http://creativecommons.org/licenses/by/3.0>
- http://creativecommons.org/licenses/by/3.0/deed.en_US
- <http://creativecommons.org/licenses/by/4.0>
- <http://creativecommons.org/licenses/by-nc/3.0>
- <http://creativecommons.org/publicdomain/zero/1.0/>
- http://pubs.acs.org/page/policy/authorchoice_ccby_termsofuse.html
- http://pubs.acs.org/page/policy/authorchoice_ccbyncnd_termsofuse.html
- http://pubs.acs.org/page/policy/authorchoice_termsofuse.html
- <https://creativecommons.org/publicdomain/zero/1.0/>

Au final, on obtient 2 marquages des publications OA : les OA_OA obtenues précédemment et au nombre de 34 076 et les OA_Hybride au nombre de 584, augmentant de 2 % le corpus France OA initial.

Le tableau et le graphique ci-dessous présentent les résultats par ordre décroissant du pourcentage des statuts des publications OA sur la période.

| | 2010 | | 2011 | | 2012 | | 2013 | | 2014 | | 2010-2014 | |
|-------------------------|--------------|------------|--------------|------------|--------------|------------|--------------|------------|--------------|------------|---------------|------------|
| | Nb | % | Nb | % |
| Corpus France OA | 4 761 | 100 | 5 883 | 100 | 6 931 | 100 | 8 331 | 100 | 8 754 | 100 | 34 660 | 100 |
| OA_OA | 4 737 | 99 | 5 809 | 99 | 6 819 | 98 | 8 177 | 98 | 8 534 | 97 | 34 076 | 98 |
| OA_Hybride | 24 | 1 | 74 | 1 | 112 | 2 | 154 | 2 | 220 | 3 | 584 | 2 |

Tableau 3 : Répartition du nombre de publications par statut des publications OA

OA_OA : publication OA issue d'un périodique OA

OA_Hybride : publication issue d'un périodique « Hybride » et marquée OA par CrossRef

Le faible taux de publications OA issues de périodiques « Hybride » reflète ici l'absence d'information de CrossRef. Ce taux progresse cependant positivement sur la période.

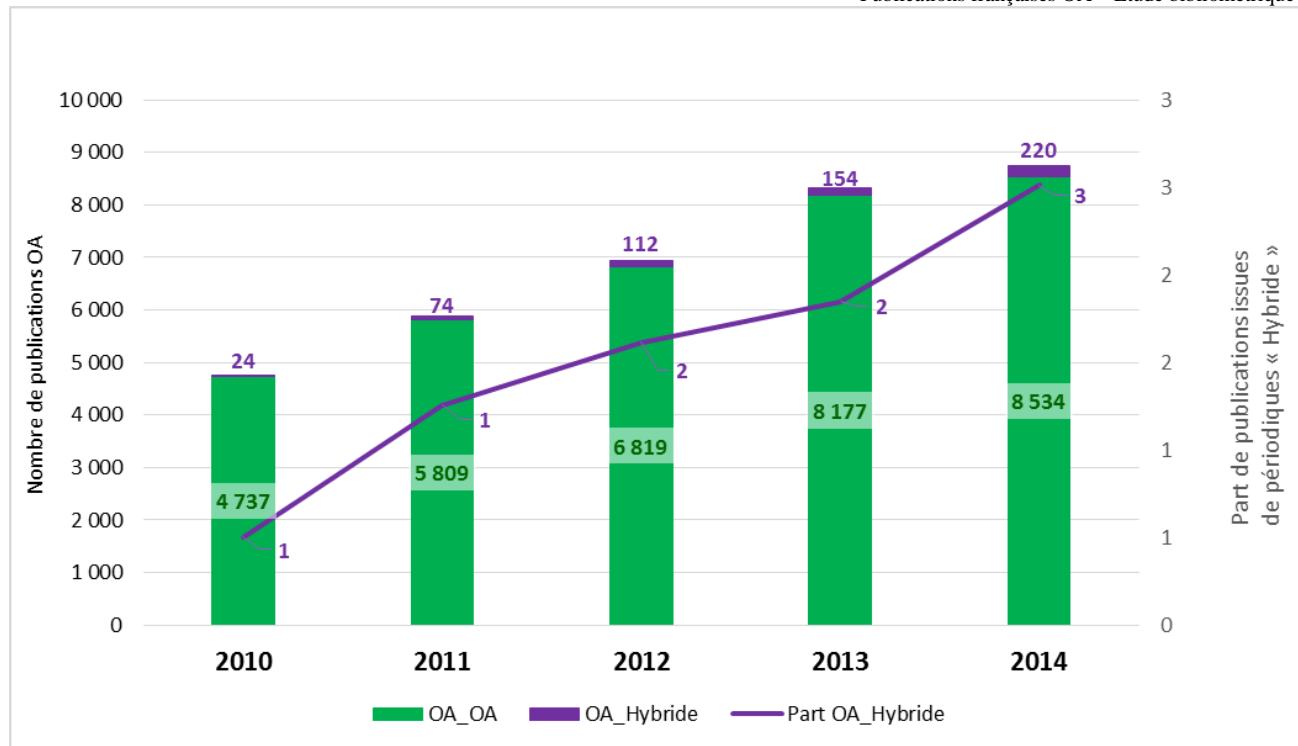

Figure 3 : Répartition du nombre de publications par statut des publications OA

Répartition du nombre de publications OA par type de documents

Le tableau et le graphique ci-dessous présentent la répartition par type de documents. Il est à noter que la somme du nombre de publications est supérieure au nombre total annuel car un document peut avoir plusieurs types de documents. En effet, 279 documents sont à la fois « Article » et « Proceedings Paper ».

Classement par ordre décroissant du pourcentage des types de documents sur la période.

| Type de documents | 2010 | | 2011 | | 2012 | | 2013 | | 2014 | | 2010-2014 | |
|-------------------|-------|-----|-------|-----|-------|-----|-------|-----|-------|-----|-----------|-----|
| | Nb | % | Nb | % |
| Corpus France OA | 4 761 | 100 | 5 883 | 100 | 6 931 | 100 | 8 331 | 100 | 8 754 | 100 | 34 660 | 100 |
| Article | 4 025 | 85 | 5 052 | 86 | 5 908 | 85 | 7 089 | 85 | 7 527 | 86 | 29 601 | 85 |

Tableau 4 : Répartition du nombre de publications OA par type de documents

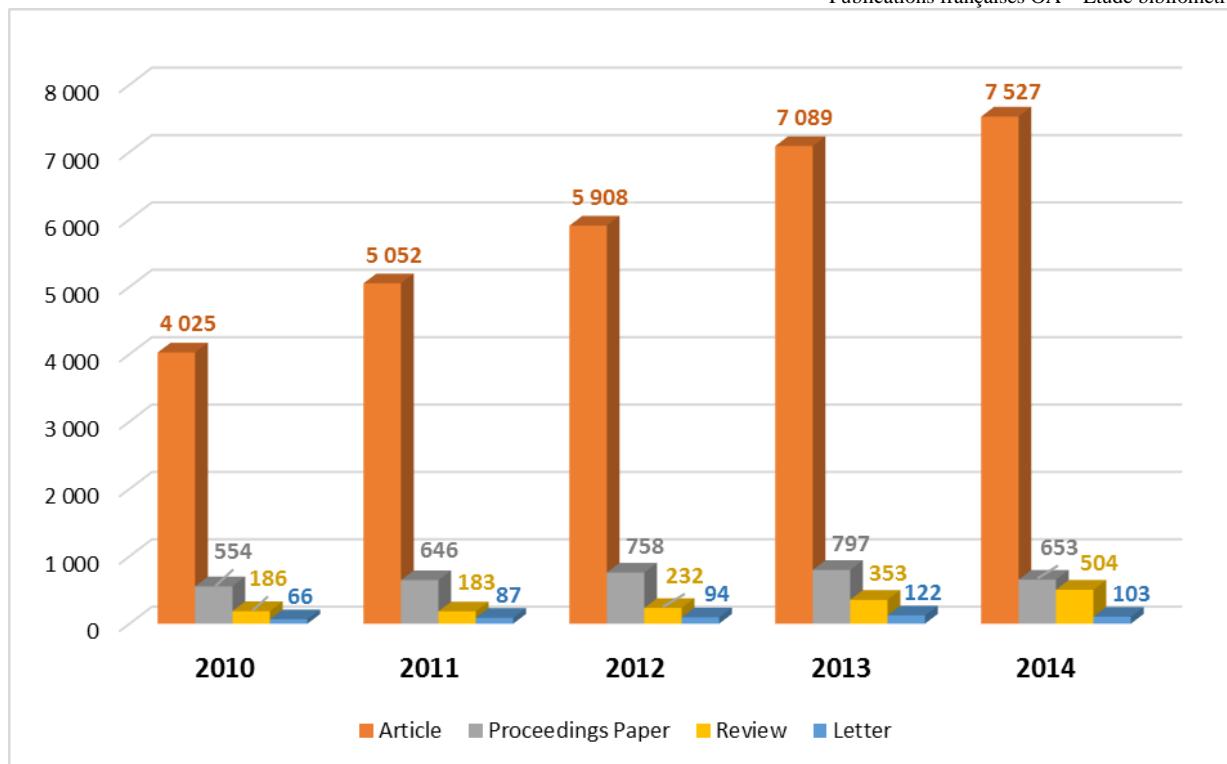

Figure 4 : Répartition du nombre de publications OA par type de documents

La répartition par type de documents des publications françaises OA en STM reflète celle des publications françaises globales, avec une forte prédominance des *articles*.

Répartition du nombre de publications OA par éditeur

Deux répartitions sont réalisées :

- une répartition par éditeur pour les périodiques OA,
- une répartition par éditeur pour les périodiques « Hybride ».

Répartition par éditeur de périodiques OA

Le tableau et les deux graphiques présentent la répartition par éditeur des périodiques OA pour les 7 « Grands Editeurs » retenus pour l'étude (Elsevier, Springer, Taylor & Francis, Wiley Blackwell, Nature, IEEE, ACS) et pour les éditeurs représentant chacun plus de 0,5 %⁸ des publications sur la période. Les données concernant tous les éditeurs sont en Annexe 1 (*à la fin de ce document*).

Avec 12 %, les « Grands Editeurs » représentent une faible part de publications OA. Parmi eux, *Nature* progresse fortement en nombre de publications et ACS n'a aucune publication issue de périodique OA.

Pour ce qui concerne les autres éditeurs, 2 d'entre eux, *Public Library Science* et *Biomed Central LTD*, se détachent nettement avec respectivement 24 et 14 %, soit à eux 2, plus de 3 fois la part des « Grands Editeurs ». Une grande dispersion de ces autres éditeurs est à signaler avec plus de 600 éditeurs représentant 20 % de la part des publications OA.

⁸ Dans les tableaux et figures, tous les pourcentages sont arrondis à l'unité : c'est pourquoi les pourcentages entre 0,50 et 0,99 sont égaux à 1.

Appui au Pilotage Scientifique

Publications françaises OA – Etude bibliométrique

Classement par ordre décroissant du pourcentage des « Grands Editeurs » puis des autres éditeurs sur la période. Le calcul du pourcentage est effectué sur le nombre de publications du corpus Editeurs de périodiques OA.

| Editeurs de périodiques OA | 2010 | | 2011 | | 2012 | | 2013 | | 2014 | | 2010-2014 | |

Figure 5 : Répartition du nombre de publications OA par éditeur de périodiques OA (nombre de publications)

Appui au Pilotage Scientifique

Publications françaises OA – Etude bibliométrique

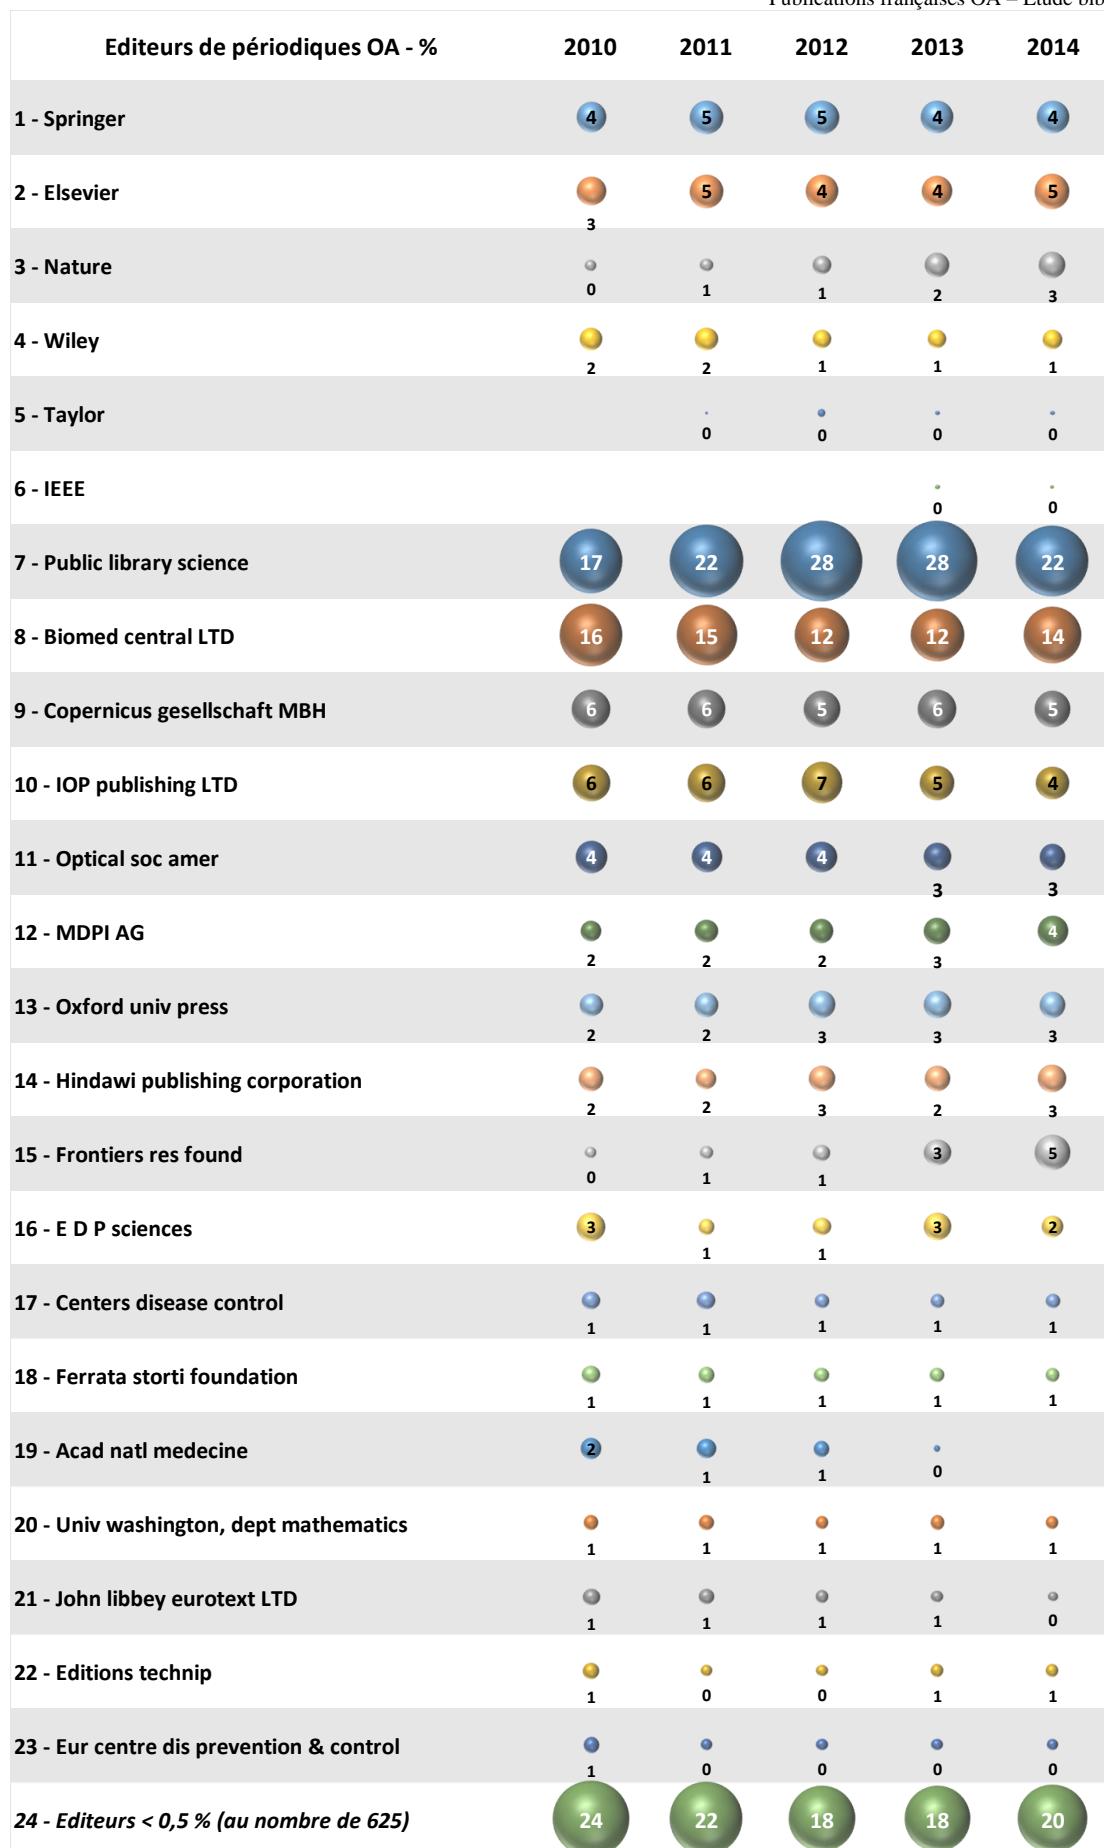

Figure 6 : Répartition du nombre de publications OA par éditeur de périodiques OA (pourcentage)

Répartition par éditeur de périodiques « Hybride »

Les publications issues de périodiques « Hybride » considérées comme OA, au nombre de 584, représentent moins de 2% du Corpus OA France et seulement 7 éditeurs.

Parmi les « Grands Editeurs », ACS avec 210 publications représente plus de 35% du Corpus Editeurs de périodiques « Hybride » sur la période et montre une forte progression, passant de 6 publications (25 %) en 2010 à 120 (55 %) en 2014. Par ailleurs, chez les autres éditeurs, *American Physical Society* avec 355 publications représente 60% du corpus.

Ces données sont fortement dépendantes du manque d'information dans CrossRef mais également de la politique d'ACS en matière d'Open Access.

Le tableau de répartition du nombre de publications OA par éditeur de périodiques « Hybride » est en Annexe 2.

Répartition du nombre de publications OA par périodique

Deux répartitions sont réalisées :

- une répartition par périodique OA,
- une répartition par périodique « Hybride ».

Répartition par périodique OA

Le tableau et les différents graphiques présentent la répartition par périodique OA pour les périodiques avec plus de 0,5%¹⁰ des publications sur la période.

Les données concernant tous les périodiques OA sont en Annexe 3.

Avec 6 776 publications sur 34 076, *PLOS ONE* représente à lui seul 20% des publications. Son nombre de publications, passé de 569 en 2010 à 1568 en 2014, a presque triplé sur la période alors que son pourcentage a progressé de 50% (de 12 à 24 %).

La moitié des publications françaises OA en STM sont issues de seulement 2 % des périodiques OA (26 titres), et l'autre moitié dans les 98% restant (1 122 titres).

¹⁰ Dans les tableaux et figures, tous les pourcentages sont arrondis à l'unité : c'est pourquoi les pourcentages entre 0,50 et 0,99 sont égaux à 1.

Classement par ordre décroissant du pourcentage des « principaux » périodiques OA sur la période. Le calcul du pourcentage est effectué sur le nombre de publications du corpus Périodiques OA.

Figure 10 : Répartition du nombre de publications OA par périodique « Hybride » (pourcentage)

Répartition du nombre de publications OA par discipline ESI

Les résultats de la répartition du nombre de publications OA par « *subject category* » apparaissant redondants par rapport à ceux de la répartition par discipline ESI, il n'a pas été jugé utile de les intégrer dans l'Etude bibliométrique.

Le tableau et les différents graphiques présentent la répartition pour chacune des 22 disciplines ESI (*Essential Science Indicators*). Les 22 disciplines ESI sont des regroupements des « *Subject Categories* » du WoS. Il est à noter que la somme du nombre de publications est supérieure au nombre total annuel car un périodique – et par répercussion une publication – peut être classé dans plusieurs disciplines ESI.

En 2012, la très forte augmentation du nombre de publications « *Multidisciplinary* » et en parallèle la très forte diminution de publications « *Biology & Biochemistry* » sont liées au changement de marquage du périodique *PLOS ONE* (passé de « *Biology & Biochemistry* » à « *Multidisciplinary* »).

Le domaine biomédical est largement prédominant avec plus de la moitié des publications.

Classement par ordre décroissant du pourcentage des disciplines ESI sur la période.

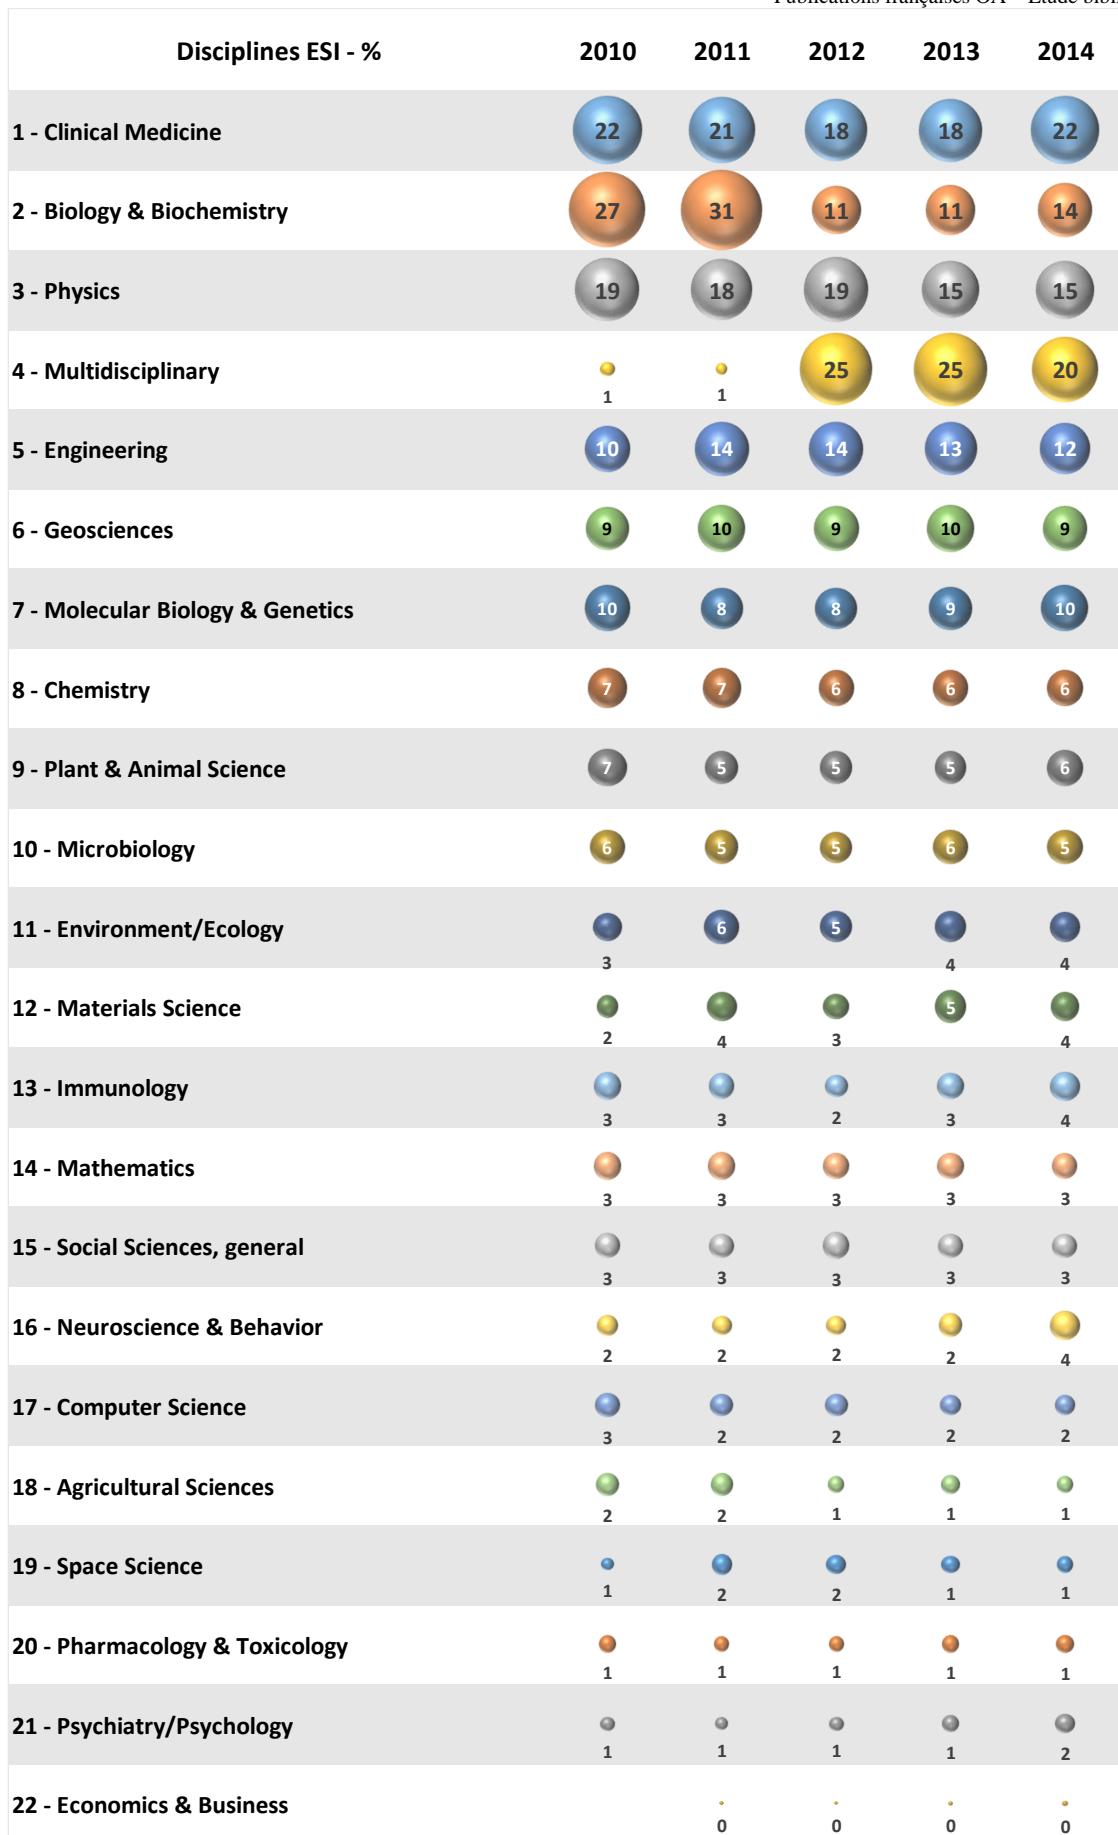

Figure 12 : Répartition du nombre de publications OA par discipline ESI (pourcentage)

Coût de l'OA : montant des APCs

Montant des APCs pour la France

L'organisme payeur est défini par les tutelles de l'auteur correspondant de chaque publication. Aussi, les publications comportant France ou un territoire d'outre-mer dans le champ RP du WoS (« *Reprint Author* ») sont repérées. Les données APC (*Article Processing Charge*) sont récupérées à l'aide de la liste du DOAJ et d'une liste de périodiques fournie par l'Inserm : pour 6% des publications OA RP France, le montant APC n'a pas été trouvé, pour 14% le montant est à 0 € (mais ce chiffre est parfois affiché quand l'information n'a pas été trouvée).

On peut ainsi estimer les dépenses APC de la France pour ses publications OA, même si la méthode a ses limites (Voir OpenAccess_BSN4_Remarques_Préconisations_30septembre2016.docx).

Les calculs des parts de publications sont effectués,

- pour la part des publications françaises OA, par rapport aux Publications françaises, et
- pour la part des publications OA-OA RP France, par rapport au Publications françaises OA.

Tableau 8 : Répartition du nombre de publications françaises, françaises OA et francaises OA avec un RP France (nombre de publications et pourcentage) et des montants APC

La part des publications RP France est élevée. D'après ce mode de calcul, la France paierait des APCs pour plus de la moitié de ses publications OA.

Avec un taux de progression moyen de plus de 20 % par an, le montant des APCs des publications OA RP France a plus que doublé sur la période 2010-2014 alors que son nombre de publications OA RP France a lui été multiplié par moins de 1,5.

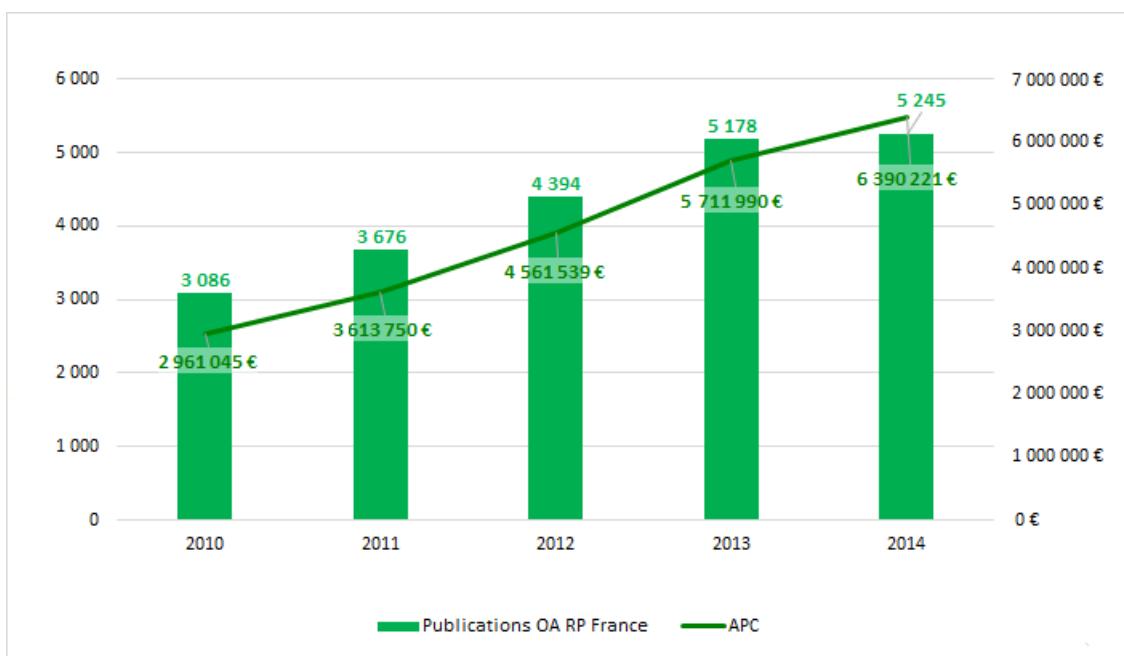

Figure 14 : Répartition du nombre de publications OA RP France et des montants APC

Montant des APCs pour 5 organismes français

L'OST n'ayant pu fournir les données de repérage des organismes de l'ESR qu'il récupère chaque année, le calcul de la part des publications OA et de leur coût par organisme demandé par le groupe BSN4 a finalement été effectué pour 5 organismes seulement (CEA, CNRS, Inra, Inserm, ParisTech) à partir des champs « Affiliations » et « Reprint Author » (RP) du WoS.

Les publications comportant le sigle d'un des 5 organismes retenus dans le champ RP ont été repérées. Il est à noter qu'une publication dont le champ RP contient plusieurs de ces organismes est comptabilisée pour chacun des organismes. Puis comme cela a été fait pour la France, les dépenses en APC de chaque organisme pour ses publications OA ont été estimées.

Les chiffres entre parenthèses des colonnes « Publis OA » et « Montant APC » sur la période 2010-2014 donnent les taux de croissance des nombres de publications OA et du montant des APCs sur la période.

Tableau 9 : Répartition du nombre de publications OA, OA RP France et France CNRS, Inserm, Inra, CEA ou ParisTech et des montants APC

Si le repérage du nombre de publications OA pour les organismes est confirmé pour l'Inra et l'Inserm, une comparaison avec les coûts réels payés par l'Inserm à BioMed Central pour l'année 2014 met en évidence un surcoût de 165 000€ : alors que l'étude attribue un montant d'APCs de près de 250 000€ pour l'Inserm, le coût réel est de près de 85 000€ soit presque le tiers (voir OpenAccess_BSN4_Remarques_Préconisations_30septembre2016.docx). Tous ces chiffres fortement surestimés sont donc à nuancer.

Montant des APCs par éditeur

Aux tableaux consacrés plus haut aux répartitions des publications par éditeur pour les périodiques OA et « Hybride » ont été ajoutées les sommes des APCs renseignées.

Montant des APCs par éditeur de périodiques OA

Le tableau présente, pour les périodiques OA, la répartition des publications par éditeur, le nombre d'OA RP France et les montants des APCs pour les 7 « Grands Editeurs » et les éditeurs avec plus de 0,5% des publications sur la période.

Pour chaque éditeur ou groupe d'éditeurs, ont été calculés un montant APC moyen (montant APC/nombre RP) par année et pour la période, ainsi qu'un taux de croissance des montants APC moyens entre 2010 (ou l'année la plus ancienne pour laquelle un montant APC est connu) et 2014.

Pour *EDP Sciences*, aucune donnée APC n'a été trouvée.

Tableau 10 : Répartition du nombre des publications OA par éditeur de périodiques OA et des montants APC

Montant des APCs par éditeur de périodiques « Hybride »

Le tableau présente, pour les périodiques « Hybride », la répartition des publications OA par éditeur pour tous les éditeurs sur la période. Pour chaque éditeur ou groupe d'éditeurs, ont été calculés un montant APC moyen (montant APC/nombre RP) par année et pour la période, ainsi qu'un taux de croissance des montants APC moyens entre 2010 (ou l'année la plus ancienne pour laquelle un montant APC est connu) et 2014. Pour quatre éditeurs, le taux de croissance n'est pas calculé : pour deux éditeurs, *Int Glaciol Soc* et *Landes Bioscience*, seul le montant APC d'une année est connu ; pour deux autres, *Taylor* et *Amer Assoc Physicists Medicine Amer Inst Physics*, la plupart ou aucun montant APC n'est connu.

Tableau 11 : Répartition du nombre des publications OA par éditeur de périodiques « Hybride » et des montants APC

Montant des APCs par périodique

Aux tableaux consacrés plus haut aux répartitions des publications par périodiques OA et « Hybride » ont été ajoutées les sommes des APCs renseignées.

Montant des APCs par périodique OA

Le tableau présente la répartition du nombre de publications OA et les montants APC pour les périodiques OA ayant plus de 0,5 % de publications.

Pour chaque périodique ou groupe de périodiques, a été calculé un montant APC unitaire par publication (montant APC/nombre RP) par année et pour la période.

Pour une partie de périodiques, les montants APC sont inconnus ou nuls.

Tableau 12 : Répartition du nombre des publications OA par périodique OA et des montants APC

Montant des APCs par périodique « Hybride »

Le tableau présente la répartition des publications et montant APC par périodiques « Hybride » avec plus de 0,5 % des publications sur la période.

Pour chaque périodique ou groupe de périodiques, a été calculé un montant APC unitaire par publication (montant APC/nombre RP) par année et pour la période.

Pour une partie de périodiques, les montants APC sont inconnus ou nuls.
