HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
Gate 4 : Structure, Thinking: Complexity for a Serious Goal

1. But, in relation with Alan Turing (1912-1954) theory which put there might be no difference between human minds and machines power advance, the distinction could result of the free will exercise for humans. Turing in “Computing Machinery and Intelligence” [3] (Turing, 1950, p.433) in section 1 entitled The Imitation Game started his paper with such a question “Can machines think ?” and by comparison we may write if humans have free will, consciousness, heart, soul (perhaps) they are, at first consideration, fundamentally different from a computer machine. At this stage of our paper, in association with our mixed object, Territorial Intelligence and Artificial Intelligence, we will not write (as Turing initially done) “from a programmed machine” point of view.

2. Can the Territories be described as Intelligent? Without claiming enough power to bring definitively answer on this fundamental question, here are some structural elements of response that’ll punctuate our reasoning. These elements also will draw from many and varied researches and professional practices. We will use a query to raise the issue of all. “Indeed, why men posed, anchored or passage in one way or another on a territory, do they form a project group or otherwise deform, or take no action, to certain situations do opportunities, threats and risks?” (Bertacchini & al., 2006).p.3.

3. Slow Investigation in Progress, Progressive Intricate and Integral Subsequently, we discovered the life course of this researcher, Resistant, Humanist and finally we read page 124 of the same book “lived solidarity is the only thing that allows increasing complexity.” This phrase, powerful, connected, in our view, both ends of a "complexity and Solidarity lived process." Likely in response to a territorial further complicated environment, and perceived as such by many actors met, policymakers broadly and territories face disruptions in their life cycle.p.4.
