Gate 2 : A Territorial Intelligence Definition seen through an Ecology Point of View of Communication

A Territorial Intelligence Definition

"an information and anthropological process, regular and continuous, initiated by local actors, physically present and / or distant, who intend to appropriate land resources by mobilizing and transforming the energy of the territorial system into a project capacity"[7,p3], [7a].

Asian Journal of Computer and Information Systems (ISSN: 2321 – 5658), Volume 04– Issue 05, October 2016, Asian Online Journals (www.ajouronline.com) 155, **Territorial Intelligence & Artificial Intelligence : On Discussion**

Ecology of Communication

We will do it within relation of the proposal for a *Ecology of Communication* exposed and demonstrated by Abraham Moles (1995) in a book “*Structural Theory of Communication & Society*” whom we quote some extracts p.94 and following “*Ecology Science communication is the relationships and interactions between different species of communications activities within a closed area such as the time available for individual or social group dispersed in such a territory* ». “*And stress it will be to achieve a description of transactional human activity, knowledge networks and systems.*”
